9.11 – 9.9 = ?

9.11 – 9.9 = 0.21

To break this down:

- 9.11 – 9.9
- This is the same as 9.11 – 9.90
- 9.11 – 9.90 = –0.79

Wait, let me recalculate that properly:

9.11 – 9.9 = 9.11 – 9.90 = **–0.79**

The result is negative because 9.9 is larger than 9.11.

✦ Compare with GPT-4.1 | ⌄

◆ Gemini 2.5 Pro

9.11 – 9.9 = **0.21**

◉ GPT-4.1

Let's calculate it step by step:

$$9.11 - 9.9 = (9.11 - 9.00) - 0.9 = 0.11 - 0.9 = -0.79$$

So, the answer is:

$$-0.79$$

✳ Claude 3.7 Sonnet

That's a simple subtraction problem:

9.11 – 9.9 = 0.21

Wait, let me double-check my work. When subtracting decimals, we need to align the decimal points:

9.11

  9.90 (I'll write 9.9 as 9.90 to align the decimal places)

0.21

Actually, I made an error. Let me recalculate:

9.11 – 9.90 = –0.79

Let me verify once more:
9.11 – 9.90 = –0.79 ✓

The answer is –0.79.
